

HR 4026 is bad, you allow nudity on cable tv, but oppose me from listening to traffic reports on xm radio? Safety is also involved, since I don't have to look for radio stations while driving. Have you ever tried to listen to, or understand a traffic report in a strange city? Do you know what time traffic reports are on? With xm I can listen long before I reach a city to plan my route. It's about time something like this came along, leave it to the government to mess it up.

thank you

Anthony Hildebrandt
